

Part One A.Northwest Transformer Factory

(A Brief Introduction)

Since our establishment in 1984, Northwest Transformer Factory, under the leadership of Director Liu Jianmin, has transformed from a small village factory with several dozen employees into Northwest China's largest factory specialized in transformer production. Our company has since been awarded the title "Advanced Private Business" on the provincial level and Director Liu Jianmin has also been awarded the title of "Village Entrepreneur with Outstanding Achievements." Currently our company employs more than 2,800 staff workers and 95 technicians – among whom there are 16 nationally certified advanced-level engineers. Our products include a wide array of transformers ranging from those suitable for major power stations to mini-transformers used in computer and various household appliances. Altogether we design 43 series, totaling over 500 models. In addition to meeting the needs of consumers in Northwest China, our products are also sold to numerous countries in Central Asia, West Asia, South Asia, and North Africa. Our annual revenues exceeds 200 million yuan.

The fundamental principle of Northwest Transformer Factory is to provide high quality products at low prices, and above all, maintain the highest standards in customer service possible. We welcome companies and individuals from all over the world to come speak with us regarding our products. In addition to our current line of products, we also handle the production of customized transformers according to the unique needs of our customers.
